Project timeline

Week 1 (November 1 - 7):

<u>Front-end:</u>
Krisha, Eliza, Matthew: Discuss application specifications, features, user stories, the general look of the app so that we're all on the same page.
Krisha, Eliza, Matthew. Discuss layout, design language, and feel of major front end pages.
Eliza: Implement landing page, set up frontend repo

<u>Back-end:</u>
Matthew, Krisha: Create database
Matthew: Work on user authentication. Create API Endpoints to get user info to be able to logIn (email and password)
Krisha: create API endpoints for other Branches, Business, Service (start in 1st week)

Week 2 (November 8 - 14):

<u>Front-end:</u>
Eliza: Create logIn form so the user would be able to log in
Matthew: Branches Page
Eliza: business overview page
Krisha: Services Page

<u>Back-end:</u>
Krisha: create API endpoints for Appointment, Service
Eliza: create API endpoints for Specialists
Matthew: create API endpoints for Payment, Reviews

Week 3 (November 15 - 21):

<u>Front-end:</u>
Eliza: work on displaying the schedule and functionality to book the appointment for the user
Krisha, Matthew (if need help): Past Appointments page, Review page, Payment Page

TBD: work on displaying the schedule for the branch from the admin prospective (if have enough time)

<u>Back-end:</u>
Matthew: clean up backend, add any missing API endpoints, refactoring e.t.c

Week 4 (November 22 - 28):

All team members
- Final run through project. Focus on testing, bug fixing, and documentation, working together. (done throughout the project)
- Thoroughly test the system for functionality.
- Identify and fix any bugs or issues.
- Ensure the system is robust and user-friendly.
- Document the project for the final submission.

Week 5 (November 29 - 30):

All team members:
- Conduct a final review of the entire project to ensure all requirements are met.
- Prepare for the project submission, ensuring all deliverables are complete.
